

FOR IMMEDIATE RELEASE:

“North American Coating Laboratories Wins Fast Track 50 Award for Sustained Business Growth”

Mentor, Ohio, September 28, 2011 - North American Coating Laboratories was recently awarded a Fast Track 50 award for sustained business growth over a 5 year period. The Fast Track 50 is a business recognition program that celebrates the contributions of local companies to the Northeast Ohio economy. Companies that are considered for The Fast Track 50 award are ranked by sales and employment growth over the previous five-year period, and are recognized as being among the 50 fastest growing companies in Northeast Ohio.

North American Coating Laboratories is an optical coatings service provider for numerous Fortune 500 customers in the automotive, medical, consumer-electronic, military, and ophthalmologic markets. Their coating solutions have been included on products from the newly designed Chevrolet Camaro to cameras used on the space shuttle. North American Coating Laboratories currently supplies coatings that improve the optical performance and durability of glass and plastic optical components that consumers use on a daily basis. In simplest terms the coatings applied by North American Coating Laboratories make electronic and analog displays easier to read by reducing glare while also helping to improve the life-cycle of glass and plastic optical components in the field.

North American Coating Laboratories remains one of the most respected and trusted organizations in the optical coatings field. Their vast expertise in both dip-applied and vacuum deposited coating technologies differentiates them from virtually all other thin-film coating service providers. North American Coating Laboratories is certified to ISO 9001:2008 quality standards and has been in business since 1974. For more information on North American Coating Laboratories you can visit their website at www.nacl.com or call (866) 216-6225.
